The screenshot displays the Arduino IDE interface. At the top, the board is set to "1 (Arduino Uno R3)". The code editor contains the following C++ code:

```
1 #include<Servo.h>
2 const int pingPin = 7;
3 int servoPin = 8;
4
5 Servo servol;
6
7 void setup() {
8   // initialize serial communication:
9   Serial.begin(9600);
10  servol.attach(servoPin);
11 }
```

Below the code editor, the "Serial Monitor" window is open, showing the following output:

```
43in, 110cm
temperature
73.44
43in, 111cm
temperature
73.44
43in, 110cm
temperature
73.44
43in, 111cm
temperature
73.44
43in, 110cm
```

At the bottom of the Serial Monitor window, there is a text input field, a "Send" button, a "Clear" button, and a waveform icon.
